S55017
hypochetical protein 2 - fruit fly (Drosophila melanogaster)
C;Species: Drosophila melanogaster
C;Species: Drosophila melanogaster
C;Date: 23-Aug-1995 #sequence_revision 19-Oct-1995 #text_change 16-Feb-1997
C;Accession: S55017
E;Bergstrom, D.E.; Merli, C.A.; Cygan, J.A.; Shelby, R.; Blackman, R.K.
Genetics 139, 1331-1346, 1995
A;Title: Regulatory autonomy and molecular characterization of the Drosophila out at first A;Reference number: S55016; MUID:95286060; PMID:7768442
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             C;Species: Streptomyces coelicolor

prohibitin-like protein F2009.200 - Arabidopsis thaliana
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Date: 23-Apr-1999 #sequence_revision 23-Apr-1999 #text_change 19-May-2000
C;Accession: T04622
R;Bevan, M.; Rose, M.; Hempel, S.; Entian, K.D.; Hoheisel, J.; Mewes, H.W.; Mayer, K.F.X. submitted to the Protein Sequence Database, October 1998
                                                    Cjaccession: AE1114

J. Pharmacol. Exp. Ther. 272:134-142 (1995).

-!- FUNCTION: This alpha-adrenagic receptor mediates its effect through the influx of extracellular calcium.
-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- TISSUE SPECIFICITY: Vas deferens, hippocampus, cerebral cortex, aorta, brain stem, heart and spleen.
-!- SUMLIARITY: Belongs to family 1 of G-protein coupled receptors.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Lomasney J.W., Cotecchia S., Lorenz W., Leung W.-Y., Schwinn D.A., Yang-Feng T.L., Brownstein M., Lefkowitz R.J., Caron M.G., "Molecular cloning and expression of the cDNA for the alpha 1A-adrenergic receptor. Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903 (2002)
-!- FUNCTION: INVOLVED IN CELL CYCLE ARREST WHEN DNA DAMAGE HAS
OCCURRED OR WHEN UNLIGHED BAD CDC25C. PHOSPHORYLATION OF
PHOSPHORYLATES CDC25A, CDC25B AND CDC25C. PHOSPHORYLATION OF
CDC25C. CREATES A BINDING SITE FOR 14-3-3 BROTELIN WHICH INNIBITS
CDC25C. THIS PREVENTS ACTIVATION OF THE CDC2-CYCLIN B COMPLEX AND
PREVENTS MITOTIC ENTRY. PHOSPHORYLATES CDC25C ON SERINB-216.
-:- SUBCELLULAR LOCATION: Nuclear.
-:- TISSUE SPECIFICITY: Expressed ubiquitously with the most abundant
expression in thymus, testis, small intestine and colon.
                                                                                                                                                                                                Semba S., Ouyang H., Han S.-Y., Kato Y., Horii A., "Analysis of the candidate target genes for mutation in microsatellite instability-positive cancers of the colorectum, stomach, and endometrium.";
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SIMILARITY: Belongs to the Ser/Thr family of protein kinases.
